

## PERRY POND

Sandy River Plt., Franklin County  
U.S.G.S. Saddleback Mountain, Maine (7½')

### Fishes

Brook trout	Redbreast sunfish
Minnows	Pumpkinseed sunfish
Golden shiner	

### Physical Characteristics

Area - 6 acres	Temperatures
	Surface - 74°F
Maximum depth - 38 feet	35 feet - 44°F

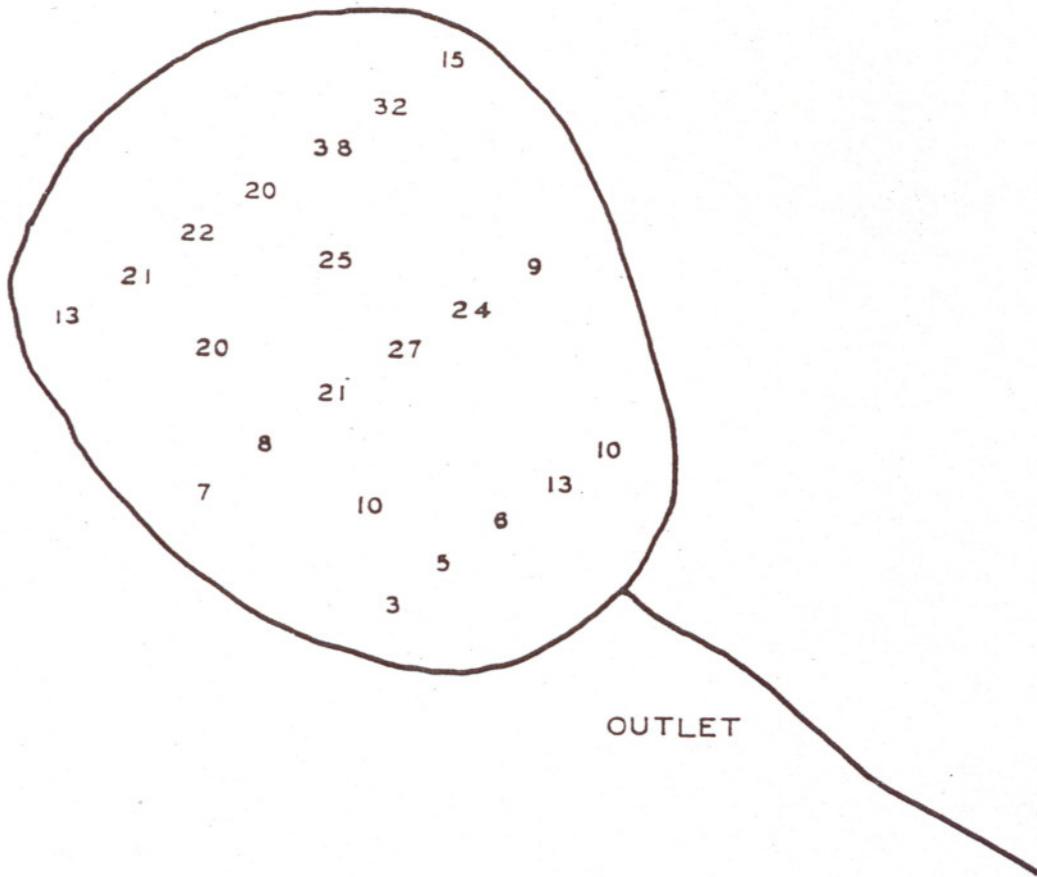

Principal fishery: Brook trout

Perry Pond is located northwest of Beech Hill in the southeast corner of Sandy River Plantation. There is no inlet, but its outlet flows southeast into the Sandy River. The shoreline of the pond is undeveloped.

Water quality in Perry Pond is good for coldwater gamefish, but there is no spawning habitat to naturally sustain a population. Brook trout are stocked annually to maintain a fishery and must compete with shiners and sunfish for food and space.

Perry Pond is reached from a trail accessed from a series of logging roads.

Surveyed - July, 1952  
(Revised - 1983, 1995)  
Maine Department of Inland Fisheries and Wildlife  
Funded in part by the Federal Aid in Restoration  
Act under Federal Project F-28-P
